

## Ach Debit Filters: Our ACH ID is Changing!

Do you have an ACH Debit Filter in place?

Due to various banking regulations, we are changing the way we assign the ACH ID to our transactions. If you have an ACH DEBIT FILTER, please advise your bank that our ACH ID is changing and add our new ID to your authorized debit list. We will be using the ACH ID (Origination ID) below on all transactions we originate after **August 8<sup>th</sup>, 2016**. As a precaution, leave the old ACH ID in place as well, as there still may be pending transactions with the old ID.

**ACH ID: 1364194759**

If you do not have an ACH Debit Filter in place, no action is required.

If you are interested in learning more about ACH DEBIT FILTERS, please contact your bank. In general, for various reasons including fraud and asset protection within financial institutions, it is becoming more common that account holders request that their bank set up a “debit filter” on their bank account. The intention of the debit filter is to block all unauthorized ACH debit transactions to a specific account, making it less likely that an account holder will incur fraud. Traditionally the debit filter will block all transactions that do not have an ACH ID that has been pre-authorized to debit that account.

Please do not hesitate to contact us with any questions or concerns, or if this change creates any undue hardship.
